

KILLED BY ELEVATOR FALL.

Three Others Injured by Nine-Story Plunge in Storehouse.

By the falling of a big freight elevator from the ninth floor to the basement of O'Reilly Bros. storage warehouse, at One Hundred and Twenty-third street and St. Nicholas avenue, to-day, two men were crushed to death and three others were so badly hurt that they will probably die.

The two were killed as they lay injured in the fallen car at the bottom of the shaft.

When the elevator cable parted and the car shot to the bottom the big weights that balance it went flying to the roof and then dropped back to the basement, crushing two of the five injured to death.

THE DEAD.

Michael McLean, Jr., twenty-two years old, of 300 East One Hundred and Twenty-third street.

John Ledy, twenty-seven years old, of 313 East Forty-sixth street.

THE INJURED.

Edward Cahill, of 308 Second avenue.

James Reilly, of 237 East Forty-sixth street.

John Burns, of 223 Eighth avenue.

The heads of the men killed were found in the wreckage. All of the bodies were taken to the morgue.

Just what caused the accident cannot be told. The experts are of the opinion that the elevator was overloaded and that it had been damaged two weeks ago.

The police, however, after the accident, arrested the general manager, Thomas Perry, of 121 East Forty-fourth street, for not waiting the action of the City.

It was 1:30 o'clock when the accident happened. McLean, Ledy, Cahill, Reilly and Burns were in the elevator. They had five from the warehouse.

FELL FROM NINTH FLOOR.

At the ninth floor the men loaded the elevator with freight. The weight was not more than 10,000 pounds, it is said. Added to the weight of the five men, the total was not much over 1,000 pounds.

The elevator had just started when

it fell from the ninth floor to the basement.

"I MUST QUIT BATTERY."

President Claussen, of Park Board, has no other plan of structure.

A conference was held this morning in the office of President Claussen by representatives of the Manhattan Elevated Railroad and of the Park Department.

Two weeks ago the landscape features of the proposed new plan for Battery Park were referred to Messrs. De Wolf and Rose for an opinion, and they today unfavorably reported on the route proposed.

President Claussen, replying to the Battery Board's demurrer to the report, said:

"The Park Department takes the ground that the 'L' must get out of Battery Park. This can be done from an engineering standpoint; but from a landscape standpoint it ought to be done, and now from an operating standpoint we will give it an understanding."

"A modification of the State street route is absolutely necessary."

The representatives of the two bodies agreed to prepare plans which will modify the State street route and obviate the existing difficulties.
